# RELAX FOR MORE HAPPINES!

CBG cannabis flowers have been found to possess several potential health benefits for consumers. CBG, or cannabigerol, is a non-psychoactive compound that has been shown to have anti-inflammatory and neuroprotective properties.

# SUSTAINABLE FARMING PRACTICE CANNADRIA & TERRALGAL

We are cultivating CBG cannabis flowers using our own organic microalgae-based biostimulant – Terralgal. We also add an extract of organic Spirulina – Phycocyanin, which is completely biodegradable and protects the flower from negative influences (heat, moisture). By doing so, Cannadria products are enriched with highly valuable phytonutrients, phenolic compounds, and bioactive molecules.

Whether you are a cannabis enthusiast or simply looking for a unique gift, this special product is the perfect way to celebrate the natural beauty and bounty of the ADRIATIC Sea. The microalgae, which were extracted from the karst parts of Adriatic Sea, provide a natural source of nutrients that help the cannabis plants grow healthy and strong. The result is a high-quality crop with a unique flavour profile and aroma.

GMO, MYCOTOXIN & PESTICIDE FREE CBG PRODUCTS

# CANNADRIA PRODUCTS

## PREMIUM CBG PRE-ROLLS
